# LAKES MODULAR WALK-IN

Lakes Showering Spaces is one of the UK's longest established and most respected showering brands with a rich history and pedigree, having been founded almost 40 years ago.

In that time, award-winning Lakes has built an enviable reputation based on quality, trust and first-class customer service.

Right down to the finest and often unseen details, all our shower doors are skilfully designed in the UK for the British market and manufactured to the highest quality standards in our very own factory.

At Lakes, we consider every element of the showering space to ensure it meets the needs and demands of the people using it, from the clarity of the glass to the performance of the doors and even the reassuring feel of the tray under your feet.

PERSONALISE YOUR  
SHOWERING SPACE

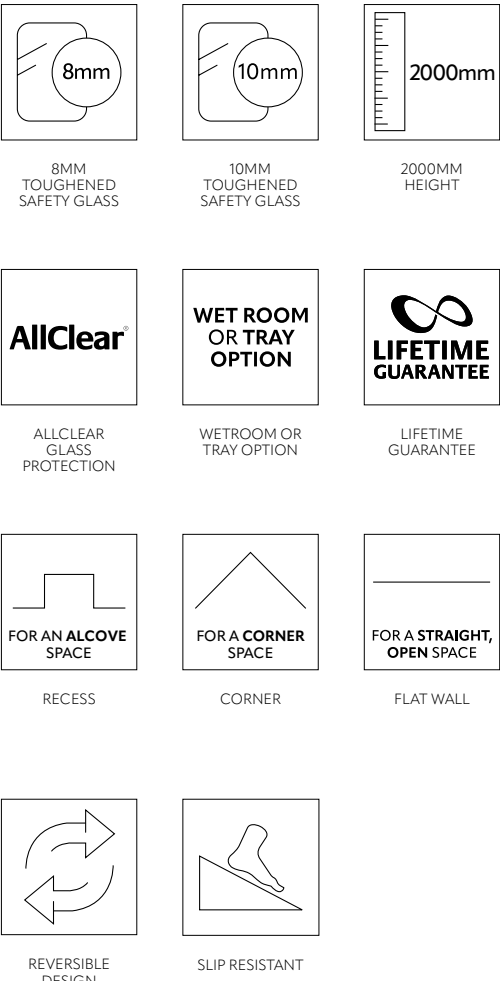

# SUSTAINABLE

Lakes is the first bathroom manufacturer in the world to have achieved B Corp certification.

Lakes is a purpose driven business, setting high standards for impact on our customers, workers, supply chain and the environment.

# ICONS

We are proud members of the Bathroom Association and collaborate with many other fellow companies to raise quality standards, improve safety, compliance and sustainability by reducing our environmental impact – all helping to shape the future growth of our industry and showering product sector.

Loyal, regular customers as well as those buying a Lakes product for the first time agree our products are 'excellent'. Lakes rating published via Trust Pilot is Excellent.

# LIFETIME GUARANTEE

Showers and bath screens are important and integral elements of any bathroom space. When it comes to transforming your space, it helps to know your choice is supported by the highest quality assurance, customer service and technical support.

Our genuine **Lifetime Guarantee** covers all of our shower doors, enclosures and spare parts, while also being fully transferable. So, even if someone moves home, the new owner will still be covered for the lifetime of the product.

We guarantee that if you have a problem with any part of a Lakes product, we will sort it, quickly. We pride ourselves on efficiency and excellent customer service, so it's likely your spare parts will arrive the next day. That's just another reason why we're recommended by homeowners, showrooms, stockists and installers across the UK.

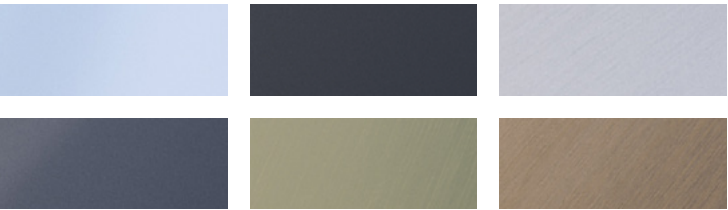

# THE COLOUR IMPACT

To provide the ultimate in bathroom personalisation Lakes has carefully developed a collection of beautiful colour finishes for all metallic parts to suit individual tastes and complement any bathroom design scheme.

Timeless silver/chrome, dramatic and bold black, subtle industrial brushed nickel and gun metal or the natural warmth of brushed brass or bronze will assist as you personalise the bathroom design.

Whichever colour finish you opt for we are confident you'll achieve a great coordinating look with any number of brassware and accessory brands available. All colours are produced to the most exacting production and quality standards, featuring super strong surfaces using anodising or PVD that are easy to clean, and are stain, UV, chemical and scratch resistant..

Taps and shower valves shown in this brochure are produced by JTP, one of the UK's leading brassware brands. Please visit: [www.jtpuk.com](http://www.jtpuk.com)

# QUALITY

At Lakes, we guarantee outstanding quality, performance and safety throughout. Lakes also regularly tests products above and beyond mandatory standards, allowing us to offer our no-quibble Lifetime Guarantee.

Made from toughened safety glass, conforming to BS EN12150-1 (which is etched onto each piece of glass), every shower door and bath screen is tested to comply with BS EN 14428:2015+A1:2018.

All shower trays pass the required quality and safety standards BS EN14527:2006 Class1/BS EN15720:2009, and our slip resistant trays achieve Class 3 UNE ENV 12633:2003

# WHY CHOOSE A WALK-IN SHOWER?

What is the appeal of upgrading to or specifying a walk-in shower enclosure?

### STREAMLINED STYLE & SPACIOUS

A walk-in shower is the ideal bath replacement, elevating its aesthetic appeal.

The virtually seamless design creates a look that is timeless, contemporary, and effortlessly deluxe. Say goodbye to the restriction of traditional doors and curtains; walk-in showers introduce a sense of openness, making your entire bathroom appear larger and airier.

### NATURAL LIGHT & SPA-LIKE EXPERIENCE

The open design allows maximum natural light to flow into the showering area, brightening the entire room.

Our walk-ins effortlessly transform your daily routine into a spa-like retreat. The clear glass enhances the overall feel, creating a genuinely calm, luxurious, and relaxing atmosphere.

### SUSTAINABLE

Walk-in showers use less metal and less packaging and naturally require less cleaning. With far fewer moving parts, they suffer less from wear and tear and the need for spare parts. Best of all, all components are fully recyclable.

### PERSONALISATION & EASY MAINTENANCE

Regardless of your bathroom's style—modern, classic, or contemporary—walk-in glass panels will complement virtually any décor.

Better yet, cleaning couldn't be simpler. Say goodbye to nooks and crannies where mould, mildew, or grime typically hide. A quick daily wipe-down is all it takes to keep your shower area shining like new.

### DURABLE & FUTURE PROOF

Designed and engineered in the UK, our Modular Walk In collection is truly built to last. The absence of large frames reduces the risk of visual deterioration from limescale and wear, a quality backed by the Lakes Lifetime Guarantee.

A walk-in shower is a smart investment for the future that can positively influence your home's sale value, especially as property buyers value modern, low-maintenance features and easy access.

# MODULAR WALK-IN SYSTEMS FOR ALL SPACES

Our modular walk-in systems can either be installed onto a shower tray or flush fit directly to a tiled wetroom floor, providing great accessibility for the specific needs of individuals of all ages and challenges. Lakes modular wetrooms are one of very few ranges that are compatible with almost any bathroom layout, size and user needs, combining safety, style and versatility in bathroom design and creating that spa look and feel. Suitable for recess, corner and flat-wall installations and where space in the bathroom is limited.

### RECESS/ALCOVE

Ideal for smaller bathrooms, ensuite, guest rooms or loft conversions, but more often installed in the space where a bath is being removed and replaced with a shower.

Using one main fixed front panel on a floor substrate allows homeowners the flexibility to design a personalised and contemporary showering space and choose from one of six colour finishes. For added luxury (and to keep the water within the showering area), add a fixed or hinged deflector panel.

### CORNER

A corner space is often the most common area available and can offer more options in terms of form and function. With more floor space often available, two panels (main/front with a return/side or return panel) can be used. This allows the walk-in layout to work more like a standard corner shower enclosure.

The side panel is a practical solution to simply preventing water splashing outside the showering area. Corner walk-in set-ups offer as much splash protection as a normal moving shower door. What's more, the 90° glass-to-glass join feature can be made to look minimal using a corner bracket and clear sealant or using a more traditional full height corner post.

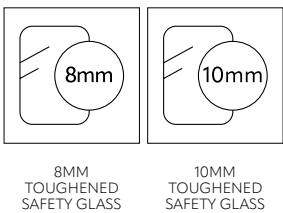

### FLAT WALL (3-SIDED OR WALK-THROUGH)

Not always reserved for larger bathrooms, but again it could be a space created as a result of a bath being replaced with a showering area. Unlike standard moving doors, creating a 3-sided enclosure with a modular walk-in set up is much easier than trying to design and install a customary enclosure with a sliding, bifold or hinged door. It's also much more cost effective.

Alternatively, a flat wall walk-in shower can also be configured as a 'walk-through' shower with double entry points, featuring a single fixed glass panel. In summary, there's a Lakes walk-in shower set up to suit any size or shape of bathroom, and any budget.

# BRACING BAR SOLUTIONS

Whether your bathroom demands 1, 2 or 3 walk-in screens and a deflector panel, our elegant bracing bars will provide the perfect blend of form and function. Each option is superbly engineered for durability and strength with screw points discreetly concealed from view, on the wall or ceiling.

### MINIMAL DESIGN WALL BRACING BAR (BB1)

- Safe and strong
- Supplied 1200mm length for cutting to length on install
- Complete with glass clamp, wall bracket and T- joint
- Default bracing bar for full height deflector hinge BY8-3\*/ BY10-3\* and Full Framed Kit F8\*
- Not suitable for PHG/10 hinge or fixed deflector panels

### GLASS TO WALL BRACING FOR HINGED DEFLECTOR APPLICATIONS (BB2)

- Safe and strong
- Supplied 1200mm length for cutting to length on install
- Complete with glass clamp, wall bracket and T- joint

### INLINE BRACING FOR FIXED DEFLECTOR PANEL TO WALL (BB3)

- Safe and strong
- Provided at 1200mm long for cutting to length on install
- Supplied with glass clamp, wall bracket and T- joint
- Required when using a fixed 90° non-rotating deflector panel
- Not suitable for walk through glass layouts

### ANGLED BRACING BAR (AB)

- A discreet option when an overhead bar is not feasible or desired
- Suitable for fixed panels up to 600mm wide
- Ready to use with glass clamp and wall bracket ends
- Nominally 45° x 600mm long. If space demands, it can be used between 30° & 60°

### GLASS TO CEILING BRACING BAR (G2CB)

- A subtle yet incredibly secure glass stabilising option
- Requires ceiling bracket
- Supplied at 600mm long, for cutting to length
- Recommended for use on panels up to 1000mm only

### FLOOR TO CEILING BRACING BAR (F2C)

- A stunning and safe method to secure fixed panels
- Requires ceiling bracket
- Supplied at 2600mm long, for cutting to length

### CEILING BRACKET (2CB)

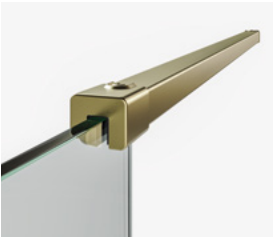

- For use with 'to Ceiling' type bracing bars (G2CB or F2C)

BRACING BAR (BB1)

BRACING BAR (BB2)

BRACING BAR (BB3)

ANGLED BRACING BAR (AB)

GLASS TO CEILING BRACING BAR (G2CB)

FLOOR TO CEILING BRACING BAR (F2C)

CEILING BRACKET (2CB)

Note: We recommend that all main panels over 500mm wide are installed with your choice of bracing bar.

# PROFILE & CORNER SOLUTIONS

Our wall and corner profile solutions offer maximum versatility and stability, feature concealed fixings plus plenty of adjustability for those out of square walls.

### WALL PROFILE (WPS)

- 1x wall profile is required whenever a glass panel connects to a wall.
- Discreet design supplied with push in seals for 8mm and 10mm glass
- Profile top cover cap
- WPS\* offers 20mm out of plumb adjustment for any wall surface tiles or wall panels

WALL PROFILE (WPS)

SLIMLINE WALL PROFILE (WPN)

### SLIMLINE WALL PROFILE (WPN)

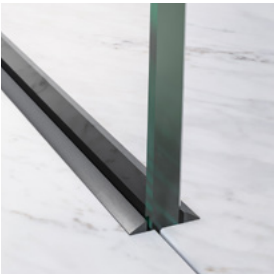

- WPN\* a slimline design offers 10mm out of plumb adjustment for any wall surface tiles or wall panels

### RECESSED WALL & FLOOR PROFILE(RW8 / RW10)

- Almost invisible wall and floor U channels for 8 and 10mm glass.
- Zero adjustment

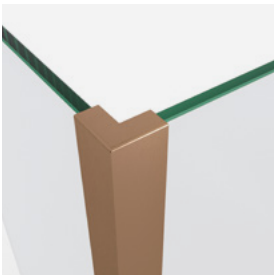

RECESSED WALL PROFILE (RW)

RECESSED FLOOR PROFILE (RW)

### CORNER BRACKET (CNR8 / CNR10)

- A minimalist designer option to join two 8 or 10mm glass panels securely at 90°
- Brackets feature concealed fixing
- A transparent corner seal provides a safe, secure and watertight corner connection

CORNER BRACKET (CNR8 / CNR10)

CORNER POST (CP8 / CP10)

### CORNER POST (CP8 / CP10)

- Glass to glass
- A feature option to join two 8 or 10mm glass panels securely at 90°
- Decorative top cap to complement wall profiles and bracing bars

# FULLY & ACCENT FRAMED WALK-IN PANELS

Elevate your walk-in shower with our Framed ranges, which use elegant glass edge profiles available in six colour finishes. Choose to Fully Frame the 8mm safety glass for maximum endurance and a striking feature, or opt for a subtle signature design by adding just one or two vertical Accent Frames.

## FULLY FRAMED AN ARCHITECTURAL EDGE

Fully frame 8mm safety glass with our elegant profiles, creating an architectural feature. This beautiful framing offers ultimate endurance, easy cleaning, and comes in 6 stylish finishes.

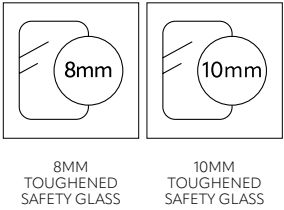

## ACCENT FRAMED DEFINE YOUR SPACE WITH A SUBTLE EDGE

Add subtle vertical edge profiles for an elegant signature design. This defined edge is not only beautiful but also enhances safety for those with visual impairment.

# DEFLECTOR PANEL SOLUTIONS

To enrich your walk-in shower design and provide water overspray protection, choose from one of our sumptuous deflector panel options. Truly personalise your showering space by selecting from our friction-free rotating panels to provide easy walk-in access or instead opt for the ultimate spa/hotel style fixed deflector panel with clear seals. Rotating panels can also be retrofitted.

## FULL HEIGHT ROTATING DEFLECTOR HINGE AND PANEL (BY8-3\* / BY10-3\*)

- Sleek and elegant
- Smooth friction-free 180° inward and 90° outward rotation
- Complete with 300mm wide glass panel in 8 or 10mm glass
- Use with BB1 bracing bar
- Maximum protection from water overspray

## HINGE TYPE DEFLECTOR PANEL (PHL / PHR + PHG)

- Sleek minimalist on-glass hinge
- Superb finish, luxury feel, heavy duty and perfect performance
- 180° inward only rotation and concealed fittings
- Available left and right handed
- Available with 300mm deflector panel with seal in 8mm (PHG8) and 10mm (PHG10)
- Use with BB2 bracing bar

## FIXED 90° DEFLECTOR PANEL (G8 / G10 + CNR / CP)

- A simple yet practical 90° fixed glass deflector
- 200mm wide panel, 8 and 10mm glass
- Can be fixed to the main panel using our corner post or corner bracket with ultra clear seal
- Use with BB3 glass to wall bracing bar
- An optional foot kit is available for installations where deflector glass is unsupported at base

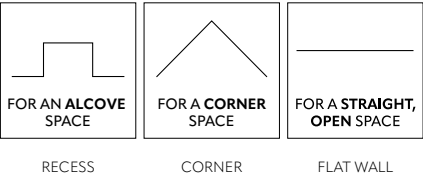

## OPTIONAL FOOTKIT FOR FIXED BYPASS (FTK)

- Optional footkit can be used when fitting a new Modular Walk-in on a shower tray with a recommended maximum depth of 60mm

Note: All Hinged Deflector Panels are left or right-handed. Please suffix codes with L or R. All illustrations show left-hand option

# WALK-IN SHOWER CONFIGURATIONS

Design the perfect Walk-In layout with infinite versatility. Choose from 8mm or 10mm glass and hardware options, available in six colour finishes for recess, corner, or flat wall installations. For custom designs, please consult your retailer.

# A GUIDE TO PERSONALISING YOUR SHOWER SPACE

Creating your own personalised walk-in showering space could not be easier with a choice of six colour finishes to complement your bathroom décor.

- 1

Select your showering space (recess, corner or flat wall).
- 2

Measure the floor space (width x depth) to include all wall tiles or wall coverings.
- 3

Choose your glass panels (8mm or 10mm) and glass size(s), plus a wall profile for each larger glass panel.
- 4

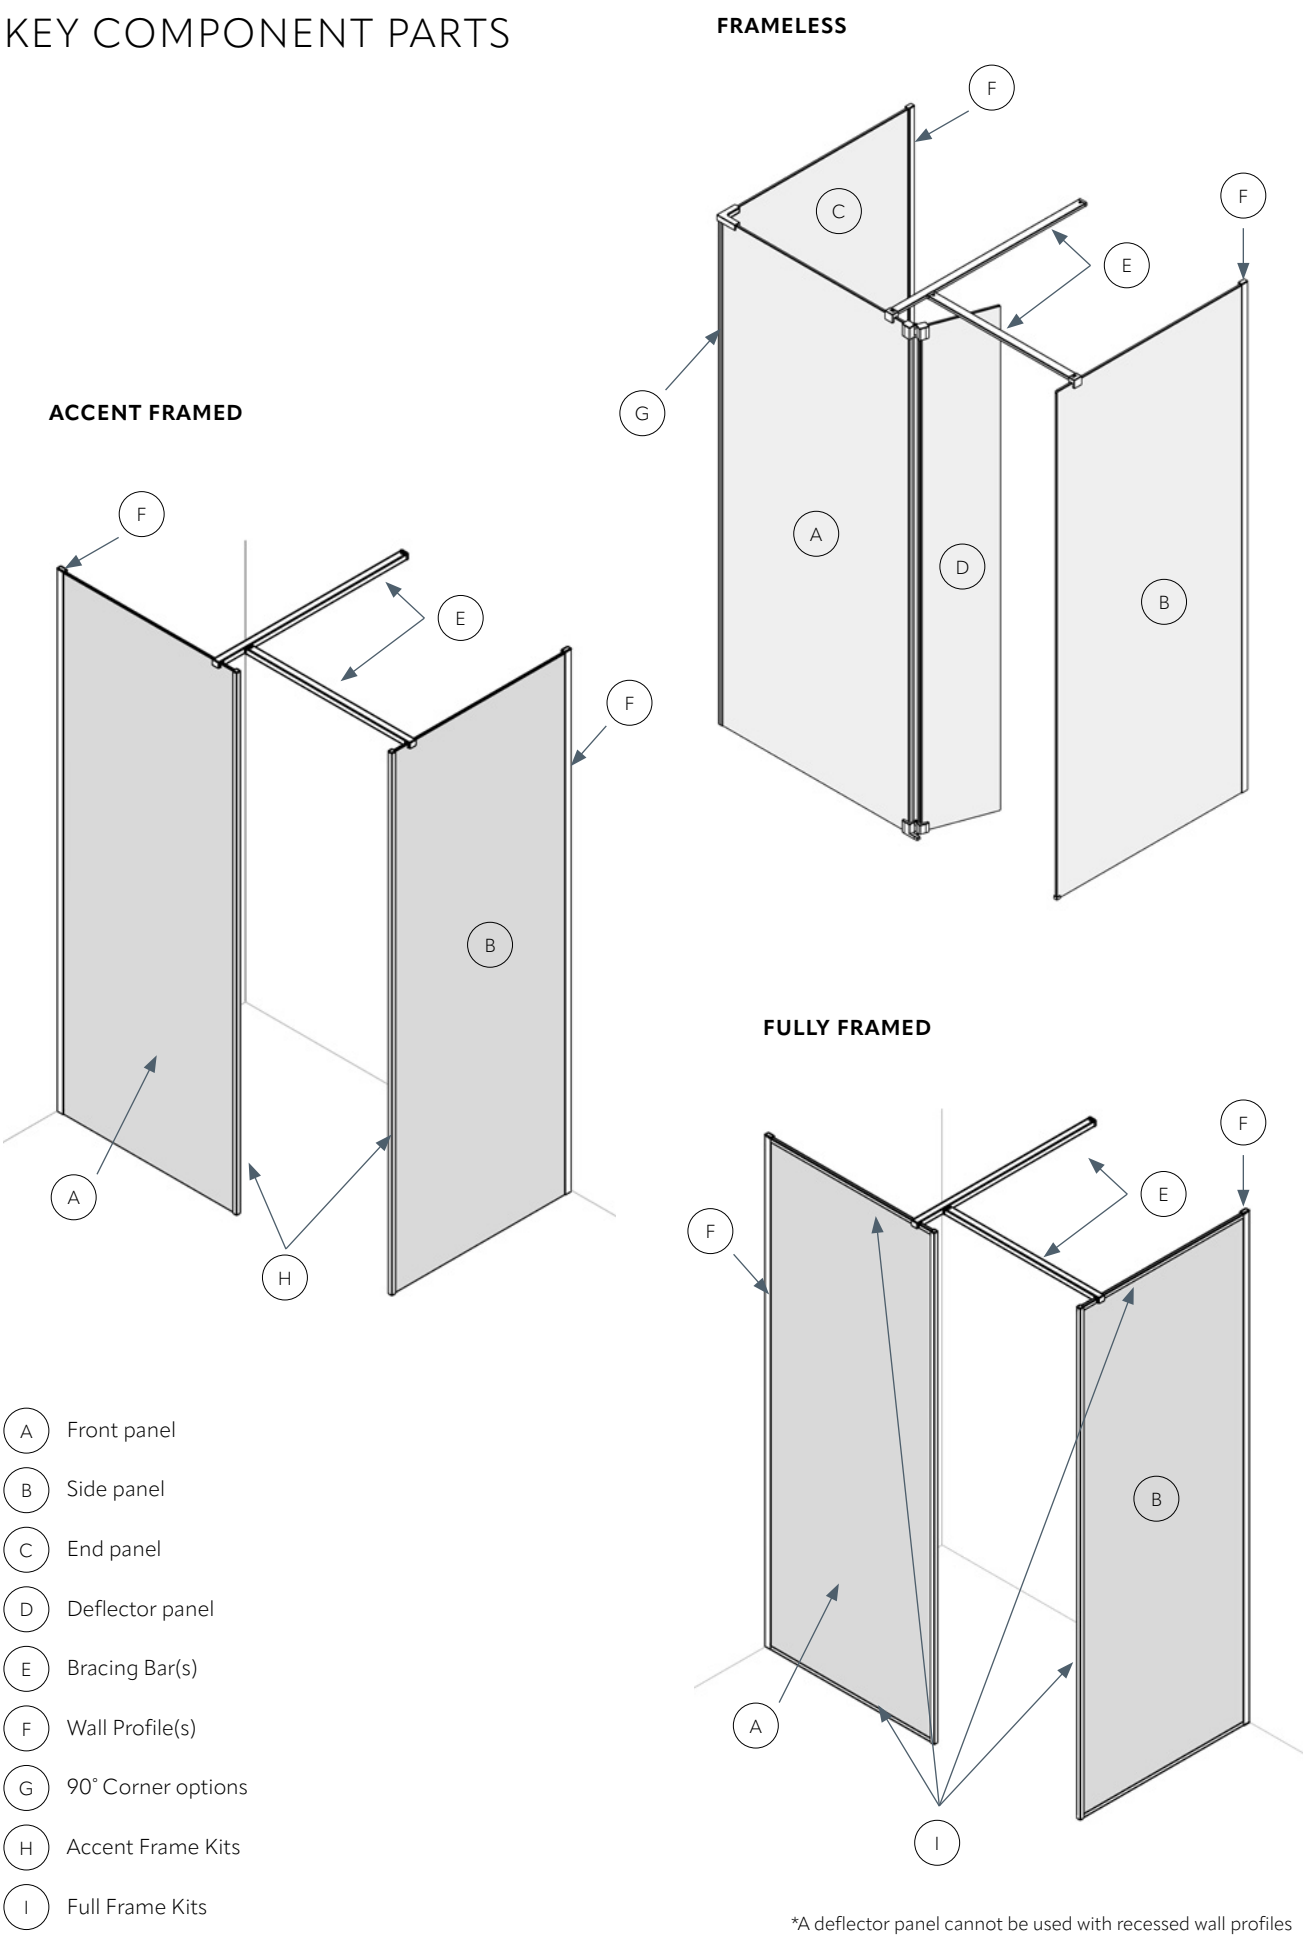

Select your bracing/stabilising preference to suit the number of glass panels, room construction and optional deflector panels.
- 5

Choose your glass connecting and deflector options.
- 6

Choose your colour finish.
- 7

Enjoy!

## KEY COMPONENT PARTS

\*A deflector panel cannot be used with recessed wall profiles

HINTS AND TIPS

We advise taking the measurements at least twice to check they're correct.

When measuring the space ensure the dimension includes final wall covering/tiles

We recommend allowing a minimum 500mm access gap between panels.

If you're choosing a full height hinged deflector panel, make sure you have enough space outside and inside of the showering space to open and close the panel.

If the glass is installed on a shower tray, ensure the tray has a minimum flat ledge of 40mm.

When measuring, it's not unusual to find some walls are not 100% straight for their entire height. Lakes wall profiles offer up to 20mm adjustment.

If you're replacing an existing shower enclosure and shower tray, check there haven't been any water leaks and that the intended floor area or tray is sound.

Check the position and height of the shower valve, shower head etc. to ensure all users can comfortably access the controls and shower head.

# WITHOUT DEFLECTOR PANELS

A luxurious option for a walk-in shower space, without the need for a large bathroom.

Unlike standard enclosures with moving doors such as a slider or hinged door, creating a 3-sided enclosure with a modular walk-in set up is much easier to install – and it can be more cost effective.

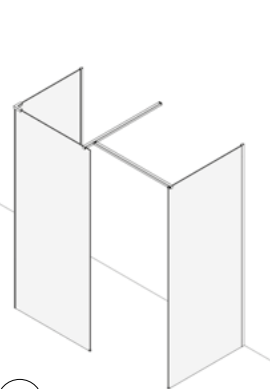

The 90° glass-to-glass feature can be joined by a corner bracket and clear seal, or by the more traditional full height corner post.

Choose from our wide selection of bracing bars, all available in six stunning finishes. All our glass features AllClear® as standard, for ease of cleaning.

# WITHOUT DEFLECTOR PANELS

The corner of a bathroom is usually the ideal location to showcase a walk-in showering space. Our extensive collection of panel sizes offers a solution for almost every bathroom. Lakes' corner options are designed to offer maximum flexibility, practicality, and style.

The side panel will help reduce water to splash-out and protect other bathroom accessories and furniture from

overspray. Simply add the beautiful bracing bar finish of your choice to match the rest of the décor.

AllClear® glass coating is standard on all of our walk-in panels for ease of cleaning.

Lakes walk-in panels can be fitted to tiled floors or most standard shower trays.

## WALL PROFILES FOR 8MM & 10MM GLASS

Description	Height mm	Code	Price Incl. VAT £ SILVER	Price Incl. VAT £ BLACK	Price Incl. VAT £ COLOURS
Slimline Wall Profile 23mm depth (10mm adjustment, complete with 8 & 10mm push in glass gasket and profile cover cap.)	2000	WPN*	60.86	62.03	68.23
Standard Wall Profile 35mm depth (20mm adjustment, complete with 8&10mm push in glass gasket and profile cover cap.)	2000	WPS*	67.62	68.92	75.81
Recessed U Profile 8mm Glass	2000	RW8*	60.86	62.03	68.23
Recessed U Profile 10mm Glass	2000	RW10*	60.86	62.03	68.23

Zero in wall out of plumb vertical adjustment.  
Glass is embedded into the recessed vertical profile, which reduces glass width by 20mm on stated widths.  
When used as a floor profile in a tiled wet room, glass height will reduce by 10mm on stated height.  
Designed for silicone fit glass to vertical or horizontal profile.  
Hinged and fixed deflectors cannot be used when installing horizontal U recessed profiles.

# CORNER WETROOM WITH DEFLECTOR PANELS

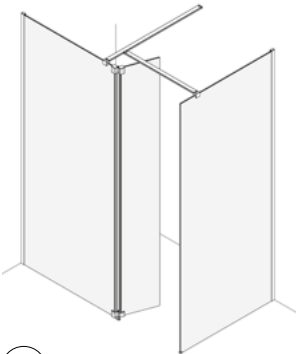

For smaller corner bathrooms or for that 'spa' look, one of our elegant corner walk-in options with a practical deflector panel can create the perfect personalised showering space. The additional panel can often make the showering area feel a little warmer once the shower has been turned off.

Choose from a fixed deflector panel or one of two rotating deflector hinged panels, and select one of six beautiful bracing bar finishes depending on your requirements. AllClear® glass coating is standard on all of our walk-in panels for ease of cleaning.

## WITHOUT DEFLECTOR PANELS

Even traditionally smaller British bathrooms can be personalised to create a wonderful showering space.

Lakes' simple yet refined walk-in panels are at home in any recess area. Within our extensive range of 8mm and 10mm toughened safety glass panels, you will find a size solution that suits the look and showering experience you're trying to create. Then, simply choose one of our

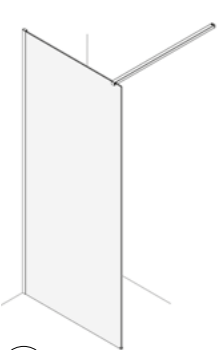

elegant bracing bar solutions to create the safest and sleekest glass panel arrangement. The glass height will add to the impression of space and enhanced light even in the tightest of spaces. Wall profiles and bracing bars are all available in a choice of six fabulous finishes.

AllClear® glass coating is standard on all of our walk-in panels for ease of cleaning.

AllClear® coating on both sides of the glass panels. Sizes shown are nominal.  
\*\*Widths indicated are undersized by 48mm to allow for tiling, wall profile (adjustment) and to ensure fit within shower base width.  
Lakes walk-in panels can be fitted to tiled floors or most standard shower trays.

WALL PROFILES FOR 8MM & 10MM GLASS

Description	Height mm	Code	Price Incl. VAT £ SILVER	Price Incl. VAT £ BLACK	Price Incl. VAT £ COLOURS
Slimline Wall Profile 23mm depth (10mm adjustment, complete with 8 & 10mm push in glass gasket and profile cover cap.)	2000	WPN*	60.86	62.03	68.23
Standard Wall Profile 35mm depth (20mm adjustment, complete with 8&10mm push in glass gasket and profile cover cap.)	2000	WPS*	67.62	68.92	75.81
Recessed U Profile 8mm Glass	2000	RW8*	60.86	62.03	68.23
Recessed U Profile 10mm Glass	2000	RW10*	60.86	62.03	68.23

Zero in wall out of plumb vertical adjustment.  
Glass is embedded into the recessed vertical profile, which reduces glass width by 20mm on stated widths.  
When used as a floor profile in a tiled wet room, glass height will reduce by 10mm on stated height.  
Designed for silicone fit glass to vertical or horizontal profile.  
Hinged and fixed deflectors cannot be used when installing horizontal U recessed profiles.

# WETROOM PANEL WITH DEFLECTOR PANELS

To ensure that the water spray stays within the walk-in showering area and the rest of the bathroom remains dry, choose from one of our elegant deflector panels.

Our contemporary fixed panel or rotating panels (which can be neatly folded away) are superbly engineered and will add practicality and visual appeal to your showering

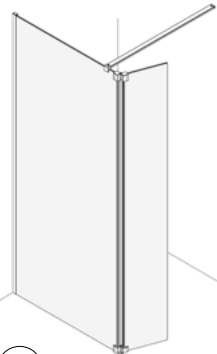

space. Retrofitting is available on all rotating deflector panels.

All deflector fittings are available in our palette of 6 colour finishes and all glass panels feature AllClear® glass coating is standard on all of our walk-in panels for ease of cleaning.

# WALK THROUGH WETROOM WITH OR WITHOUT DEFLECTOR PANELS

You may have seen or even experienced them in hotels, but now you can enjoy a walk through wetroom in your own home.

Ideal for installation where space in the bathroom is not an issue and where a standard shower tray size isn't what you're looking for. Perfect on a tiled floor, we recommend allowing around 500mm minimum access width on both sides.

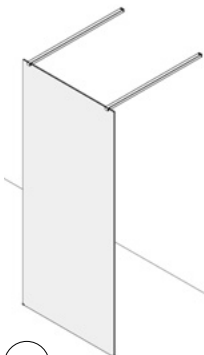

Our selection of stunning, secure and practical bracing bars, available in a choice of colour finishes, will complement your bathroom décor and styling.

And if you want to add a deflector panel, choose one of our fixed or rotating panel sizes to suit your style and help to keep the water within the walk through area. All rotating deflector panels can be retrofitted.

# WALK-IN PANEL ACCENT FRAMED

Lakes Walk-In showers provide almost endless versatility.

If you are looking for a subtle signature design element for your showering space, then simply add one or two vertical glass edge profiles to the panel. It's not only an elegant design feature, adding a defined edge to the glass will assist those with visual impairment to enjoy a safer showering experience.

# WALK-IN PANEL RECESSED PROFILE

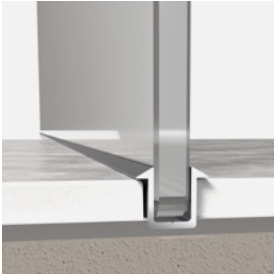

Create the most minimalist walk-in panel showering space by using Lakes' recessed wall and floor profiles. Carefully designed to be incorporated into wall and/or floor tiling, our recessed profiles provide truly robust walk-in panel stability, while being "barely noticeable" in your chosen colour.

Vertical recessed profiles can be used with glass mounted on a tray surface. Horizontal/floor profiles are only suitable for true wetroom/tiled floor bases.

RECESSED WALL & FLOOR PROFILES

When using a recessed floor profile – deflector panels cannot be used

# STONE TEXTURE SHOWER TRAYS

Each of Lakes' stone textured shower trays are stunning and distinctive, with veins and character that pay tribute to natural materials and showcase Lakes' skilled craftsmanship. Not just aesthetically pleasing, they are created to be felt and enjoyed, while meeting the high demands of a modern showering space.

The surface is designed to offer a unique sensory underfoot experience - soft, warm and slip resistant – while the surface pattern eliminates the risk of water puddling.

Choose from timeless signal white or super matt finish anthracite to transform the shower area and complement wall and floor themes of any design.

## FEATURES:

Produced from recycled Dolomite stone

72% Dolomite mineral and 28% resin

29mm slimline height

Fully recyclable

Exceptional resistance to wear and impact

Stain and chemical resistant

Integral anti-bacterial hygiene properties

90mm Ø waste

Can be trimmed on site

10-year guarantee

Easy cleaning

Thermal insulation properties

25% lighter than standard stone resin trays, typically 36kg / m2

All trays comply to BS EN14527:2006 Class 1

Slip Resistant to Class 3 UNE ENV 12633:2003

Slip Resistant to Class 3 BS EN 16165 ANNEX C

Install on floor or level to floor

Suitable for marine ply boarded or concrete floors

Supplied with colour matched stainless steel waste grate

Dimensional tolerance +/-5mm wxl up to 1400; +/-7mm over 1400

SQUARE TRAYS

RECTANGULAR TRAYS

CLEANING & MAINTENANCE

We recommend cleaning stone effect shower trays regularly with clean warm soapy water ONLY, rinse and wipe over with a soft cloth or sponge.

DO NOT USE abrasive, scouring, caustic or corrosive cleaning products.

To remove limescale deposits use a 50:50 solution of white vinegar and water. Rinse thoroughly after application.

# STONE RESIN SHOWER TRAYS

Superbly engineered and produced in the UK to the most exacting standards, this shower tray boasts a modern, minimalist low-profile form with a truly comfortable standing area.

It offers exceptional water drainage and a fresh, uncomplicated look, specifically designed to be the perfect partner for the Lakes Modular Walk-in shower collection.

**FEATURES:**

- Slender low height 25mm profile
- Double skinned, crisp white acrylic ABS capped finish, for incredible strength and rigidity.
- Super strong and rigid
- 50mm height on outer edge
- 50mm Ø waste outlet
- 30% lighter than standard resin trays
- Super white finish
- All trays comply to BS EN14527:2006 Class 1/BS EN15720:2009

- Suitable for marine ply boarded or concrete floor
- Can be fitted flat to floor or with easy fit riser kit options
- Integral anti-bacterial hygiene properties
- Stain and chemical resistant
- 60mm Ø waste sold separately
- 10-year manufacturer’s guarantee

# PRODUCT CARE

To maintain your guarantee, we recommend cleaning as below:

- Glass: Only use a soft cloth and mild detergent, rinse off thoroughly after cleaning.
- Metal and metallic surfaces: Use only a soft cloth and warm soapy water. Rinse off thoroughly.
- In hard water areas, regular cleaning of your Lakes product will help to prevent the build-up of limescale.
- Limescale can be removed using a 50:50 solution of white vinegar and water.
- Check your shower door for functionality periodically.
- Do not use "Spray & leave" cleaning products on the metal surface as these will cause damage to your product.
- Do NOT use cleaning products, bleaches, solvents or abrasive pads.
- Non-compliance with these cleaning instructions will invalidate the product's Lifetime Guarantee and may cause plated / painted / anodised surfaces/finishes to deteriorate and could adversely affect safe operation of the enclosure.

# AFTER SALES COMMITMENT

At Lakes we are passionate about providing the very best customer service. Lakes' excellent customer service is supported by an extensive stock of spare parts across all ranges.

Call our dedicated customer service team on **01684 853870** who will deal with your enquiry and will swiftly dispatch your spares order. Alternatively email **customerservice@lakesuk.com** or head to our website and complete our enquiry form **www.lakesuk.com/contact-us**

# SPARE PARTS

We have a team of technical experts who can deal with and offer advice on any queries you may have and arrange dispatch of spare parts within 3-5 working days. Call us on **01684 853870**.

# WHAT TO DO IF SOMETHING GOES WRONG

Should the product not function correctly on initial use, firstly, contact the installer to check the installation is in accordance with your installation instructions. Should this not resolve difficulties or should performance decline, refer to the 'Troubleshooting' section within the installation guide.

Alternatively, our customer service team can assist or, if necessary, arrange for a service engineer to visit. Please call **01684 853870**, email **customerservice@lakesuk.com** or head to our website and complete our enquiry form: **www.lakesuk.com/contact-us**

# RETURNS POLICY

Lakes' will not accept return of any product no longer required that has been opened. We do not accept return of any product if the packaging has been damaged. If the product is unopened and not damaged, we will accept the return subject to agreed returns charges, but no longer than 3 months from date of original delivery.

As part of Lakes continuing policy of product improvement, we reserve the right to amend specifications, colours and prices and discontinue products without prior notice.

Images, room layouts and associated bathroom products are for marketing and visual purposes only. The colours and finishes shown in the catalogues are as accurate the printing process permits.

\*Errors and Omissions Exempt.

# LAKES GUARANTEE

Walk-in panels and are covered by our **Lifetime guarantee** against manufacturing defect.

Shower trays are covered by a **10-year guarantee** against manufacturing defect.

Both guarantees are valid on condition that the products have been installed and maintained in accordance with the product's fitting instructions provided and used as intended. Damage or defects resulting from modification and or repair by unauthorised persons, improper use or ex-display products are not covered. Lakes will resolve any defects resulting from manufacturing fault free of charge via repair or replacing parts. This must be only conducted by Lakes Bathrooms or an approved agent.

Please retain your proof of purchase to validate your guarantee. If your product becomes defective call us on **01684 853870** or email: **customerservice@lakesuk.com**

# ALLCLEAR®

Lakes Glass has been developed to ensure a crystal clear, smear-free, showering space. Our glass includes AllClear®, nano-bonded coating treatment, which is applied to both sides of the glass, meaning water, limescale and soap scum slide off the glass rather than sticking to it.

It stays clear and clean and comes as standard at no extra cost. Lakes Glass with AllClear® is 10 times more scratch resistant than standard glass, so it can handle whatever life throws at it.

# INSTALLATION

Prior to installing your Lakes product, please read the installation guide in full. Failure to do so may invalidate your guarantee.

Shower trays must be plumbed and level, walls should be tiled or paneled down to the tray and sealed before doors are fitted. Check tray height before installation as there are manufacturing tolerances that must be allowed for.

When considering a new bath screen and bath installation, or adding a bath screen to an existing bathtub, the following checks must be made:

The bath rim should be essentially flat in form where the screen is located.

Baths with integrated soap dishes, 'roll top' bath style design and uneven bath rim types are not compatible with bath screens, and may cause water leaks.

Any bath handle grips included with a bath should not interfere with bath rim/bath screen.

When choosing your bath screen, check that any moving panel(s) whether inward or outward opening will not interfere with brassware, furniture or accessories in operation (taps/shower heads, basins, WCs, radiators etc).

It is recommended that the shower head position is centrally fitted on the same wall as the bath screen.

Bath rims must angle down toward the bath area to ensure that water landing on the rim drains into the bath. It is essential to check across rims, including corners using a small spirit level or a small amount of water to assess fall direction. Bathtubs exhibiting outward fall are not compatible.

Baths must be fully supported with timber battens/ support framing under the rim. Inadequate support can cause rim to drop/create outward fall.

# LAKES QUALITY GUARANTEED

We have created this product information section to assist with your purchase and to provide useful information once your Lakes shower enclosure is installed.

For further information please visit: **www.lakesuk.com**

All Lakes shower enclosures, shower trays & bath screens are manufactured to the highest standards according to ISO 9001: 2015 Quality Management System.

All Lakes shower enclosures & bath screens are UKCA (& CE) marked, tested & conform with BS EN14428:2015+A1:2018. All glass used in construction is thermally toughened & marked according to EN12150-1.

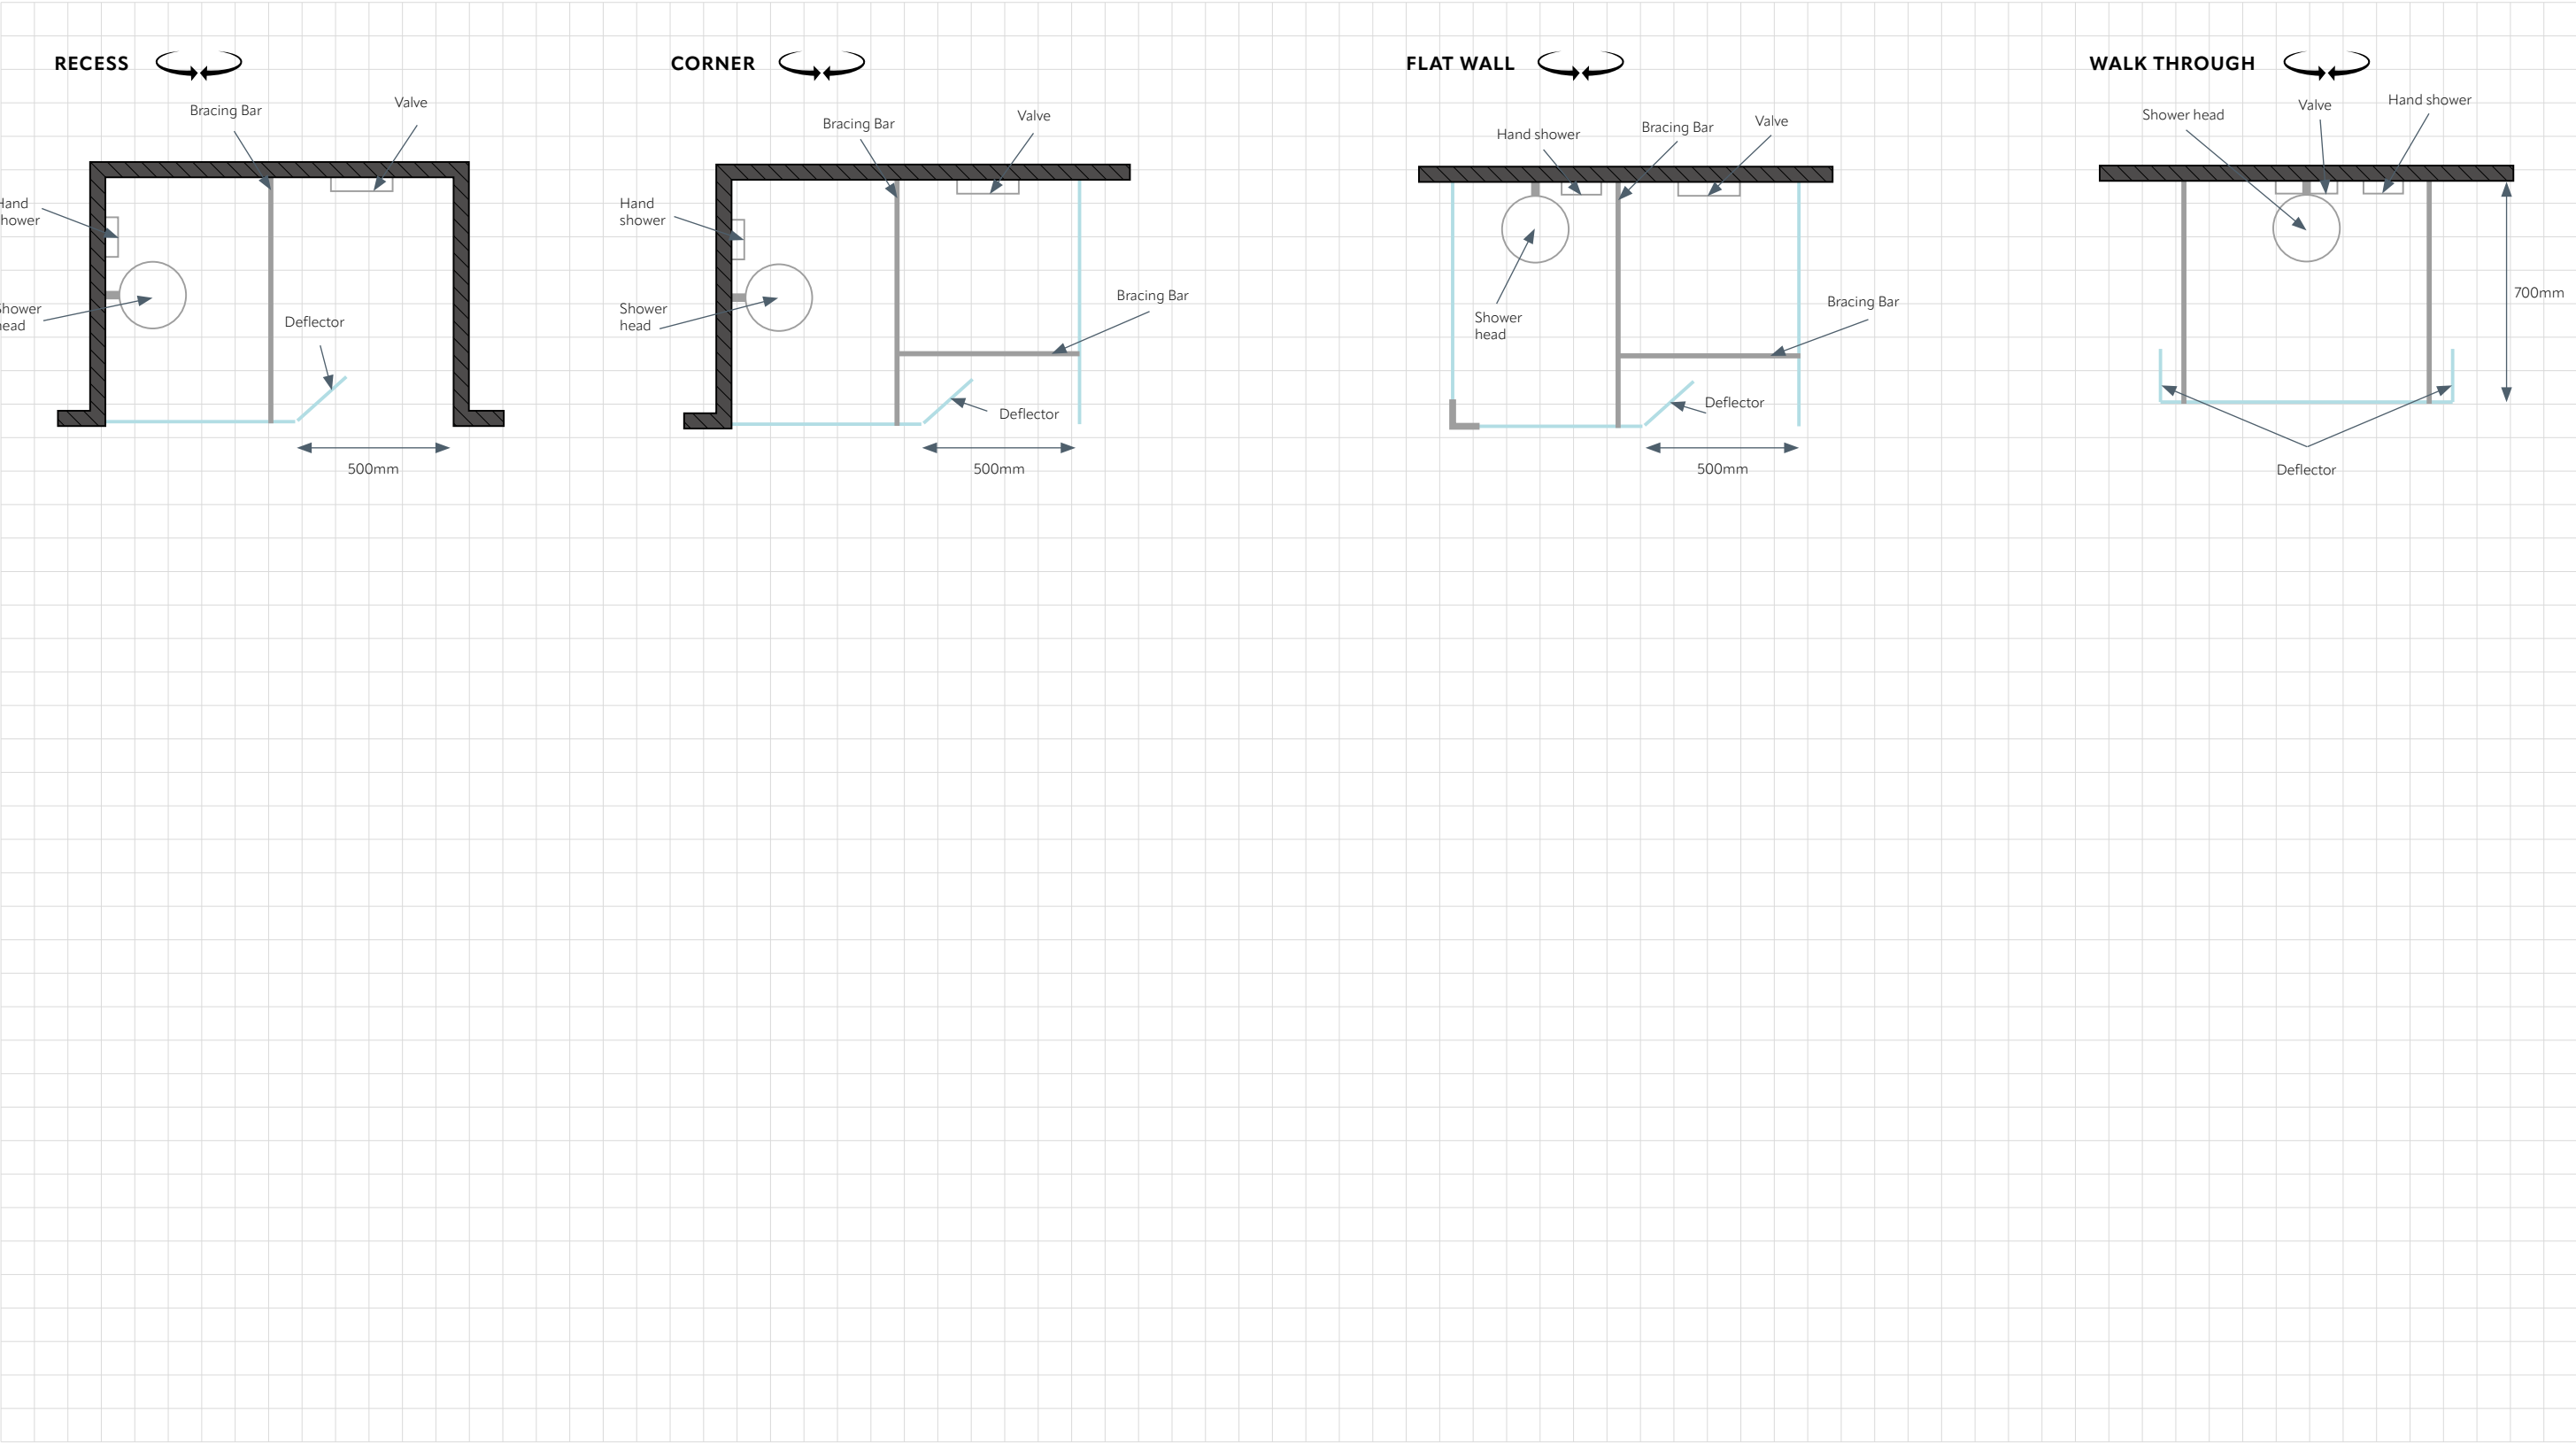

Lakes regularly tests above and beyond required standards to ensure the ultimate product quality and performance.

Lakes shower trays comply to BS EN14527:2006 Class 1/ BS EN15720:2009. Shower wastes are manufactured to BS EN 274-1: 2002
